

# CENTER FOR URBAN HEALTH DEVELOPMENT-ETHIOPIA

## (CFUHD-E)

The center for Urban Health Development-Ethiopia, officially launched on the 3<sup>rd</sup> February 2016 in the presence of Dr. Zufan Abera, Ethiopian Health Extension Program Directorate Director of the FMOH, is established to serve as a resource pool and knowledge hub for Ethiopia's urban health related agendas. The Center is believed to provide evidence for policy and programming purposes.

The objectives of the establishment of the center for Urban Health Development-Ethiopia includes:

- The center will serve as a knowledge hub (information center) for urban health in Ethiopia; and
- All available urban health materials will be collected, stored and shared to individuals and organizations working on urban health

### What resources are available at the Center?

- Different books (related to urban health, TB, Cancer)
- Journal articles: Journal of Urban Health, EJHD, JCED, The Lancet, Journal of Cancer Survivorship
- Internet access
- Reports (National and Global)
- National guidelines

### Opportunities

- The Center for Urban Health Development-Ethiopia supports MPH students working their thesis on urban health related issues in Ethiopia.
